

K.V.D. KlearVision digital LTD
"Expert-Systems for non-expert people"

3 Feb 2005

JinCheng and K.V.D. KlearVision digital are pleased to announce a license agreement to incorporate Klearvision's Photo-D Pro in every JinChang's Digital LCOS Photo Lab. This joint product offers a higher level of excellence to Digital Mini Lab users and clients.

"By choosing to include **Photo-D Pro** in our **LCOS** Digital Minilabs, we have chosen to ensure that our entire **LCOS** Digital Minilab product line has automatic analysis and correction of digital photos. This technology, born of research work undertaken in scientific imaging and leading companies in the Graphic-Arts market, provides the level of excellence that we seek to offer our customers" says **Tay Keng Soon**, managing director of **JinCheng Technology**.

"We are pleased to be working with **JinCheng Technology** and for the opportunity to incorporate **Photo-D Pro** into their photo labs. Our agreement with **JinCheng Technology** is a significant step towards demonstrating that **Photo-D** provides unique value to our licensees and their customers," said **Moshe Keydar**, chairman of board, K.V.D KlearVision digital LTD. "We are pleased that **JinCheng Technology** has chosen **Photo-D Pro**, in order to provide images corrected to the customer's expectation at the time of taking the picture. Using our product, customers will have their memories perfectly preserved."

Photo-D is an innovative rule-based Expert System that automatically optimizes and corrects photos, preparing them for printing or viewing. Benefiting from years of digital imaging and color science technological expertise, **Photo-D** emulates the decision-making ability of a graphic-art expert in order to automatically analyze and correct the digital photos. **Photo-D** uses Fuzzy Logic and Artificial Intelligence techniques making quality digital photo printing quick and easy like never before.

Photo-D Pro, a fast, high productivity automatic enhancement/correction, and application designed for micro/mini, large photo labs, and Professional Graphic Arts companies. **Photo-D Pro** offers workflow capabilities that make it perfect for photo labs. **Photo-D Pro's** ability to check predefined Hot Folders enables the automatic enhancement of every set of pictures and the delivery of corrected files to a predefined output folder. Photo-D Pro can process thousands of pictures per hour and can be customized to the photo lab's color preference.

About KlearVision Digital
